AUSTRALIAN JOURNAL OF ECOLOGY

ISSN 0307-692X Published quarterly

Edited by: P. FAIRWEATHER, J. LUDWIG, S. McINTYRE

Published for the Ecological Society of Australia, the *Australian Journal of Ecology* is the premier journal for pure and applied ecological research in the Australasian region. The journal welcomes papers from regions outside Australia and the Pacifc rim.

The *Australian Journal of Ecology* publishes original papers describing experimental, observational or theoretical studies on terrestrial, marine or freshwater systems, which are considered without taxonomic bias. Critical reviews, comments on previously published papers and short notes are regular features of the journal. We also welcome brief papers proposing new hypotheses to explain established ecological phenomena: prospective authors for this category of papers should contact the Editors for guidelines.

Each year a special thematic issue combining top level papers is published in the *Australian Journal of Ecology*. In 1995–96 there will be three special issues featuring papers on water quality assessment, on herpetology and on theriology.

ABSTRACTING AND INDEXING: The *Australian Journal of Ecology* is covered by *Current Contents/Agriculture, Biology and Environmental Sciences, ASCA, Science Citation Index, Environmental Periodicals Bibliography, Current Awareness in Biological Sciences, Geological Abstracts, University Microfilms, Ecology Abstracts, Scisearch, Research Alert, Biosis, Oceanographic Literature Review, Zoological Record, Cambridge Scientific Abstracts, Geobase, Wetlands Value Database* and *CAB International*.

Australian Journal of Ecology is published quarterly in March, June, September and December. The subscription rates for 1996 (Volume 21) are A$365.00 (Australasia), US$399.00/A$562.00 (elsewhere). All prices include postage, which is by surface post within Australia and overseas by air speeded delivery.
